DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, 9, 10, and 13-20, drawn to coprocessors with selective data broadcasting, classified in class 712, subclass 34.
 - II. Claims 6 and 7, drawn to mode switching, classified in class 712, subclass 43.
2. The inventions are distinct, each from the other because of the following reasons:
 - a. Inventions I. and II. are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as altering the mode of a processor. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
4. Unsuccessful attempts were made to contact the attorney by telephone. Furthermore, section 812.01 of the Manual of Patent Examining Procedure (MPEP) states the Examiner does not have to telephone the attorney or agent in cases where the Restriction is deemed complex. The Restriction/ Election is deemed complex by the Examiner and the attorney/agent should be afforded the benefit of receiving the action for careful review and time to formulate a response.
